QUARTZ SINK CATALOGUE

WHY TO USE GRADDE® SINK?

Granite sink is the most preferred type of sink because of its long life span, which consist of blending quartz stones and powders with a resin-like natural material pouring them into molds and baking them.

Granite sinks are resistant to high temperatures and its impacts. Due to the special densitiy and durability of the material, it has a significant resistance to scratches. It is impossible for the stains to be permanent due to its feature of not absorbing liquid. It can be easily cleaned due to its slippery, smooth and non-permeable surface.

The color alternatives that stand out in the granite sink produced with different color alternatives are white, black, anthracite, grey and beige.

SOFIA SMS1

- Mutfak Bataryası
- Arıtma Bataryası
- Sıvı Sabunluk
- Bardak Yıkama
- Sebze Meyve Yıkama Haznesi
- Süzgeçli Yıkama Haznesi
- Kesme Tahtası
- Sifon Takımları, Sifon Süzgeçi, Sifon Kapağı
- 304 Kalite Paslanmaz Eviye
- Balpeteği Dokusu ile Çizilmeye Dayanım
- 68X45 Eviye Ölçüsü
- 2 Yıl Garanti
